

## WHY ROMEX®?

- Weed-free joints – permanently clean surfaces
- Durable & load-resistant – for private and public areas
- Fast & easy application – saves time on site
- Frost & weather resistant – built for long-term performance
- Low maintenance – less cleaning, lower costs

## MADE FOR PROFESSIONALS – LOVED BY HOMEOWNERS

Whether it's:

- Driveways & patios
- Public spaces & streets
- Renovation & repair projects

ROMEX® delivers reliable results you can trust.

## COMPLETE SYSTEM – ONE PARTNER

From product to project:

- Expert advice
- On-site support
- Proven system solutions

ROMEX® stands for quality, safety and real expertise.

## ROMEX® – THE JOINTING COMPOUND PROFESSIONALS

Engineered performance. Proven worldwide.

Since 1989, ROMEX® has been a leading manufacturer of resin-based jointing compounds and resin-bound systems, developed and produced in our own laboratories in Germany. With decades of expertise in building chemical solutions, we combine innovation, quality and practical know-how to deliver reliable results on every project.

Our products are trusted worldwide – from private driveways to heavily used public spaces. What sets ROMEX® apart is not only the performance of our systems, but our strong technical support and on-site service. We work closely with contractors, planners and partners to ensure every application is successful.

ROMEX® stands for experience, proven quality and solution-driven thinking – delivering durable, permeable and long-lasting paving solutions you can rely on.

## DO IT NEAT. DO IT RIGHT – ROMPOX® - ECOFINE

ROMPOX® ECOFINE is a market-leading, high-quality jointing mortar designed for a flawless finish, even in the finest joints. Its easy application makes it the perfect choice for DIYers and professionals alike, taking the hassle out of precise work. Ideal for tight joints where other products fall short, ECOFINE delivers a clean, durable result every time – exactly what’s needed for Irish conditions and craftsmanship.

### Properties

- No resin film, high compressive strength
- Chlorine and salt water resistant, no weed growth
- Highly water-permeable, frost and de-icing salt resistant
- High-pressure cleaner resistant, can be applied in drizzle
- Firm to walk on, mixed ready to use

### Areas of application

- Joint widths from 3 mm
- Around the house, areas with medium traffic loads
- Tightly laid paving and slabs
- 2 cm ceramic tiles in bonded construction method
- Surfaces around pools, almost all coated and sensitive stones
- Paved areas and natural stone surfaces

## GERMAN TECHNOLOGY

### THE ULTIMATE JOINTING COMPOUND DESIGNED FOR PROS

- EXCELLENT PRODUCTS
- PERMEABLE PAVING
- NO WEED GROWTH

Our 1-component jointing compounds are suitable for almost all natural and concrete stones as well as slabs from a joint width of 3 mm. These mortars are immediately premixed ready for use and harden after processing with air-oxygen. The user-friendly, water-permeable jointing compounds are ideally suited for do-it-yourselfers due to their ease of application. The main areas of application are patios and garden paths.

- Very user friendly
- Top products for the professional
- Ideally suited for polygonal slabs and quarry stone slabs
- For medium traffic loads
- No weed growth
- Water permeable
- Frost and de-icing salt resistant

## THE HANDY ONE – ROMPOX® - EASY

ROMPOX® EASY is a ready-to-use jointing mortar for straightforward applications and easy surfaces. Simple to apply with minimal effort, it's ideal for patios, paths and light-use areas, and suitable for joints from 5 mm. Perfect for DIYers and quick jobs, it delivers clean, reliable results without the fuss.

### Properties

- Easy to use, no weed growth
- Highly water-permeable, frost and de-icing salt resistant
- High-pressure cleaner resistant, can be applied in drizzle
- Firm to walk on, mixed ready to use
- Also for do-it-yourselfers

### Areas of application

- Joint widths from 5 mm
- Joint widths from 3 mm possible with greater effort
- Around the house, areas with light traffic loads
- Almost all coated and sensitive stones
- Paved areas and natural stone surfaces
